Academic Programs

Mid-South Community College offers associate degree, technical certificate, and certificate of proficiency programs to meet student and community needs. Courses included in each program address general education knowledge as well as behaviors needed for good citizenship and successful careers. Program goals and course objectives are listed on each course syllabus to inform students in advance about course content so that they can better relate their college studies to their personal educational and career goals.

General Education Learning Outcomes

Mid-South Community College is committed to serving the educational needs of the Arkansas Delta. While the College provides college transfer and employment-related education to meet the pressing short- and long-term needs of its diverse student body, it also recognizes the critical role of general education in preparing students for the demands of the workplace, personal growth, and civic responsibility.

In order to provide certificate and degree-seeking students with the communication, analytical, interpersonal, and research skills necessary to meet the challenges of a constantly changing world, the faculty and administration of MSCC require a coherent body of courses in English, speech, mathematics, history, social sciences, and computer fundamentals for all degree-seeking students. MSCC faculty members require reading, writing, research, and oral communication activities in all credit courses to help students strengthen critical communication, critical thinking, and information processing skills.

The MSCC general education curriculum provides the means by which associate degree students will accomplish the following outcomes. As part of the College’s academic assessment program, faculty members have created rubrics which clarify how outcomes are measured and are used to evaluate students. Course rubrics are readily available to students as part of the electronic resources provided for courses in Campus Cruiser.

For ACTS Equivalent Course Numbers, please visit http://acts.adhe.edu/studenttransfer.aspx.

General Education Outcomes

MSCC graduates are expected to --

GEO 1: Communicate effectively in standard, edited American English.

- Provide content that is clearly focused and supported by the writer’s understanding of the topic.
- Use appropriate grammar, punctuation, spelling, and syntax.
- Logically organize and develop ideas in writing.
- Provide an appropriate introduction and conclusion to organize the speech.
- Provide main points that are well developed and clear.
- Use appropriate gestures, movement, and eye contact to give a poised and professional presentation.
- Speak clearly and understandably using standard, edited English.
GEO 2: Solve problems using mathematical skills appropriate to the task.
- Demonstrate ability to complete different mathematical tasks by using fundamental mathematical operations and principles.
- Perform and apply mathematical operations efficiently and effectively.
- Demonstrate understanding of mathematical tasks by communicating results in written form.
- Effectively use technology to help solve mathematical problems.

GEO 3: Develop work ethic skills relevant to the students’ future academic or professional careers.
- Demonstrate the ability to effectively work in a team.
- Demonstrate effective communication, cooperation, and organizational skills to complete all assigned tasks.
- Demonstrate dependable character and the ability to respect others regardless of personal or cultural differences.
- Demonstrate a positive attitude and the ability to appropriately handle criticism.
- Demonstrate that consistent attendance and productivity are a priority.
- Maintain an appropriate appearance for academic and professional settings.

GEO 4: Use common computer applications to locate, communicate, process, and store information.
- Demonstrate basic computer and operating system skills.
- Perform core application tasks within computer software packages, such as Word, Power Point, and Excel.
- Use a search engine and/or electronic databases to access, navigate, and evaluate information on the Internet.
- Communicate effectively using email and/or online discussion forums.

Program Types

Technical/Occupational Programs

Mid-South Community College offers technical/occupational programs which lead to associate of applied science (AAS) degrees, as well as technical/occupational certificates or certificates of proficiency which are shorter in length and focused on specific skills sets.

Most programs incorporate career pathways which allow students to begin a program at the certificate level, earn an award which will support employment, and then continue working toward additional awards which will support career advancement. Students can enter and/or stop out at multiple points.

The certificate of proficiency program includes 7-18 credit hours of technical/occupational courses that prepare students for a specified level of competency in a particular field. No general education courses are included although general education skills are incorporated into courses within
the program. Most certificate of proficiency programs articulate with technical certificates or associate of applied science degrees at MSCC.

A technical certificate program is a planned program of classroom and laboratory work at the collegiate level. It includes the completion of core general education skills and enables students to reach a specified level of competency in an occupational field. The program, which contains 24-42 credit hours, may also be part of or apply toward an associate degree program.

An associate of applied science (AAS) degree program requires 60 credit hours for completion. Some specially approved AAS programs may require more than 60 credit hours. AAS programs are intended for students who plan to enter the workforce immediately after program completion. AAS programs at MSCC include capstone or internship courses, which support the integration and synthesis of knowledge and skills acquired in previous coursework, on-the-job training in internship courses, as well as critical thinking and independent learning. These courses are restricted to students’ final semester of enrollment.

More than 18 baccalaureate degrees are available through the MSCC University Center, including bachelor of applied science degrees which support a seamless transfer option for students completing associate of applied science degrees. Additional information about these transfer opportunities may be obtained from university degree center offices in the MSCC University Center or from the MSCC Registrar’s Office.

Other four-year colleges and universities may accept some technical/occupational courses in transfer; however, students to whom transfer is important should get assurances of transferability for specific courses in writing, in advance, from the institutions to which they plan to transfer.

Currency of Technical/Occupational Skills: Technical/Occupational programs at MSCC are periodically revised to reflect employment needs and technological advances. Consequently, students who are unable to complete a technical/occupational program within 150 percent of the stated time period (3 years for Associate of Applied Science degrees) may have to fulfill different program requirements than those listed in their catalog of entry.

Transfer Programs

Mid-South Community College offers a college-transfer curriculum through its Associate of Arts (AA) degree program, its Associate of Science degree program, and the Associate of Arts in Teaching degree program. Students can complete the first two years of basic college courses in English, mathematics, social science, fine arts, and humanities (while continuing to live and work at home).

Associate of Applied Science students now have a transfer option through the Bachelor of Applied Science (BAS) degree. Individual technical/occupational courses may transfer to four-year college and universities; however, the acceptance of transfer credit is the prerogative of the receiving institution. Students should obtain assurances in advance from the institution to which they wish to transfer.

Most colleges and universities will accept transfer credits from MSCC, which is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools, 30 N. LaSalle St., Suite 2400, Chicago, IL 60602-2504, (800) 621-7440.

However, the acceptance of transfer credit is the prerogative of the receiving institution. Students should obtain assurances in advance from the institution to which they wish to transfer.
Students can obtain current information about the transferability of MSCC courses to Arkansas public colleges and universities by accessing the Arkansas Course Transfer System (ACTS). Students are guaranteed the transfer of courses listed in ACTS and assured equitable treatment in the application of those credits for the admissions and degree requirements. This listing represents the minimum number of transfer courses that may be accepted by a particular Arkansas institution. Students wishing to transfer a course not listed in ACTS should contact the receiving institution to determine transferability.

Course transferability is not guaranteed for courses listed in ACTS as “No Comparable Course.” Additionally, courses with a “D” frequently do not transfer, and institutional policies may vary. ACTS may be accessed on the Internet by going to http://acts.adhe.edu/studenttransfer.aspx.

The MSCC Registrar’s Office serves as a resource for students who are planning to transfer and provides information and a current list of colleges and universities accepting MSCC credits in transfer.

Advanced Manufacturing Technology
Machining

MSCC is committed to frequent review and revision of its technical programs to ensure they meet the evolving needs of business and industry. The following certificates of proficiency in machining are under revision for students declaring the programs as of the fall semester of 2014. New students should confer with an academic advisor prior to enrolling in fall classes.

Certificate of Proficiency in Machine Technology (Machine Attendant)

18 Credit Hours

The Certificate of Proficiency in Machine Attendant provides students with the technical skills needed to perform basic machining set-up, programming, and operation. Students will develop the knowledge and skills for job entry into Computer Numerical Control milling and lathe work.

Job Opportunities

Metal Finisher

Program Goals

- The program trains individuals in the design, application, and operation skills of computer integrated manufacturing which requires experience in computer numerical controlled (CNC) machining, quality control, and computer utilization
- The program provides students with the foundation education, training and direction to work in entry-level positions in the machining field.

Program Requirements

The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Certificate of Proficiency in Machine Technology (Machinist I)

18 Credit Hours
This program enables students to further develop machining skills first introduced in the Machine Attendant Certificate of Proficiency.

Job Opportunities
Metal Finisher       Machinist Level I       Machine Attendant       Quality Inspector

Program Goals
• The program provides students with the foundation education, training, and direction to work in entry-level positions in the machining and CNC machining fields.
• The program prepares students to set up and operate CNC lathes and mills from specified setup information, interpret part drawings, and determine the proper tooling to complete a specified project.
• The program provides students the opportunity to become proficient in both manual and CNC operations.
• The program provides students the ability to complete the National Institute of Metalworking Skills (NIMS) certification for level I machining operations.

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

18 Credit Hours

Job Opportunities
Metal Finisher       Machine Attendant       Machinist Level II       Machinist Level II       Quality Inspector

Program Goals
• The program will help students become proficient in setup, operations, and basic programming of manual and CNC operations.
• The program will provide the student with the ability to determine process methods of machining, communicate process improvements, and identify necessary programming information.

• The program will give students the skills to complete the National Institute of Metalworking Skills (NIMS) certification for level II machining operations.

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Manufacturing
MSCC is committed to frequent review and revision of its technical programs to ensure they meet the evolving needs of business and industry. The Associate of Applied Science and the Technical Certificate in Advanced Manufacturing are not available to new students enrolling after the spring semester of 2014. These programs will be replaced by proposed revisions to the Mechatronics programs. Current majors should refer to their catalogs of entry for program requirements.

Mechatronics
MSCC is committed to frequent review and revision of its technical programs to ensure they meet the evolving needs of business and industry. The following certificates of proficiency in mechatronics are under revision for students declaring the programs as of the fall semester of 2014. New students should confer with an academic advisor prior to enrolling in fall classes.

Certificate of Proficiency in Mechatronics: Electrical Level I

16 Credit Hours
The Certificate of Proficiency in Mechatronics: Electrical Level I prepares maintenance technicians with a clear understanding of the principles and application of electricity/electronics to the maintenance and trouble-shooting of industrial electronic controls, including circuitry, wiring, safety, ladder logic, and programmable logic controllers as they apply to installation, maintenance, and troubleshooting of industrial machinery.

Job Opportunities
Maintenance Technician
Program Goals
Program graduates will
- Develop knowledge of electricity/electronics theory and techniques and demonstrate the skills necessary to support maintenance and repair operations in a manufacturing environment.
- Obtain the foundation education, training and direction to work in entry-level positions in the industrial maintenance field

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.
MANF 1153 .................. Electric Motor Control .................................................. 3
MANF 2044 .................. Basic Programmable Logic Controllers ......................... 4
TECH 1003 .................. Introduction to Blueprint Reading .................................. 3
TECH 1013 .................. Shop Essentials ............................................................. 3
TECH 2033 .................. Basic Electricity/Electronics .......................................... 3

Certificate of Proficiency in Mechatronics: Electrical Level II

18 Credit Hours
The Certificate of Proficiency in Mechatronics: Electrical Level II prepares maintenance technicians with a clear understanding of the principles and applications of electro-fluid power controls, electronic drive systems, and ControlLogix programming and troubleshooting as they apply to installation, maintenance, and troubleshooting of industrial machinery.

Job Opportunities
Maintenance Technician

Program Goals
Program graduates will
- Develop knowledge of the principles and applications of electro-fluid power and ControlLogix programming and demonstrate the skills necessary to support maintenance and repair operations of industrial machinery.
- Demonstrate an understanding of advanced programmable logic controllers
- Demonstrate the work ethics and safety awareness expected in industrial environments.

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.
MANF 1443 .................. Electro-Fluid Power Controls ....................................... 3
MANF 2113 .................. Advanced PLC’s ......................................................... 3

TECH 2993 .................. Internship ................................................................. 3
Certificate of Proficiency in Mechatronics: Mechanical Level I

15 Credit Hours
The Certificate of Proficiency in Mechatronics: Mechanical Level I prepares maintenance technicians with a clear understanding of the principles and applications of basic hydraulic/pneumatic systems, mechanical drives and bearings, and conveyors and support systems as they apply to installation, maintenance, and troubleshooting of industrial machinery.

Job Opportunities
Maintenance Technician

Program Goals
Program graduates will
- Demonstrate a clear understanding of the principles and applications of basic hydraulic/pneumatic systems, mechanical drives and bearings, and conveyors and support systems in a manufacturing environment.
- Obtain the foundation education, training and direction to work in entry-level positions in the industrial maintenance field.

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

MANF 1403 ............... Conveyor & Support Systems .............................................. 3
MANF 2023 ............... Mechanical Drives and Bearings ...................................... 3

Certificate of Proficiency in Mechatronics: Mechanical Level II

18 Credit Hours
The Certificate of Proficiency in Mechatronics: Mechanical Level II prepares maintenance technicians with an advanced understanding of the principles and applications of basic hydraulic/pneumatic systems including precision alignment as they apply to installation, maintenance, and troubleshooting of industrial machinery.

Job Opportunities
Maintenance Technician

Program Goals
Program graduates will
- Understand and appropriately apply the principles and techniques of troubleshooting and maintaining advanced hydraulic/pneumatic systems
- Demonstrate the work ethics and safety awareness expected in industrial environments.

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Welding

Certificate of Proficiency in Flux-Core Arc Welding Technology

15 Credit Hours

The Certificate of Proficiency in Flux-Core Arc Welding Technology introduces students to the knowledge and skills to achieve AWS Sense Level I certification or NCCER Level 2 certification in basic and flux-core arc welding processes including plasma and gas cutting, grinding practices with bench, angle, rust treatment, and welding inspection processes; blue print reading and the use of hand tools, shop tools, reading tapes and micrometers.

Job Opportunities

- Welder
- Fitting Specialist
- Inspector
- Glazier
- Ironworker
- Boilermaker
- Shipbuilder
- Fabricator

Program Goals

Program graduates will

- Develop knowledge in theory, techniques, and welding skills necessary to support maintenance and repair operations in a manufacturing environment
- Obtain the foundation education, training and direction to work in entry-level positions in the welding field.
- Complete AWS Sense Level I Certification or NCCER Level 2 Certification in flux-core arc welding.

TECH 1003............Introduction to Blueprint Reading.................................................. 3
Allied Health Sciences

Mid-South Community College offers students several career pathways in the Allied Health Sciences and offers the general education requirements for Arkansas State University’s Associate Degree in Nursing, which is offered on the MSCC campus.

Certificate of Proficiency in Emergency Medical Technician

7 Credit Hours

The Certificate of Proficiency in Emergency Medical Technician provides students with academic and practical skills using the 1994 Emergency Medical Technician National Standard Curriculum. The purpose of the Emergency Medical Technician program is to prepare students to provide basic life support to patients in the pre-hospital emergency care setting.

Special Admissions/Enrollment Requirements:

To enroll in EMER 1007 Emergency Medical Technician, students must meet the following criteria:

- Be at least 18 years of age by the time of completion
- Have a high school diploma, or equivalent, at the time of application
- Meet required placement test scores or successful completion of DRDG 1024 Developmental Reading II and DENG 1054 Developmental English II
- Complete a program application, which is available from the Allied Health Sciences Division or email at alliedhealth@midsouthcc.edu
- Submit to a substance abuse screening and criminal background check during the first week of class
- Submit to additional Arkansas state requirements as described during the course

Job Opportunities

Emergency Medical Technicians are employed by: private ambulance services; fire departments; hospitals; volunteer services and/or ancillary care.

Program Goals

- Provide basic level of both knowledge and demonstrable skills for each individual completing the program
- Prepare students to pass the Arkansas State EMT Certification Examination in accordance with the 1994 Emergency Medical Technician National Standard Curriculum and enter the job market.
- Demonstrate the professional/ethical behaviors of timeliness, punctuality, responsibility, confidentiality, and of self-directed task completion
Program Requirements
The following outline of requirements should be used as a planning worksheet.

EMER 1007 ................. Emergency Medical Technician ............................... 7

Certificate of Proficiency in Nursing Assistant

7/8 Credit Hours
The Certificate of Proficiency in Nursing Assistant provides students with academic and clinical education in nursing related services for long term residents.

Special Admissions/Enrollment Requirements
Students must meet the following criteria:
• Be at least 18 years of age by the end of the CNAS 1014 Nursing Assistant course
• Have a high school diploma, or equivalent, by the end of the course
• Meet required placement test scores or successful completion of DRDG 1024 Developmental Reading II and DENG 1054 Developmental English II
• Submit to a substance abuse screening and criminal background check during the first week of class
• Complete and submit proof of a negative tuberculosis (TB) skin test prior to clinical training

Job Opportunities
Nursing Assistants work in nursing homes, hospitals, hospice programs, rehabilitation centers and home care agencies.

Program Goals
• Provide basic level of both knowledge and demonstrable skills for each individual completing the program
• Create a method of advancement for each individual completing the program
• Prepare students to pass the AR State Certified Nursing Assistant Certification Examination and enter the job market or continue their studies in related Allied Health programs
• Demonstrate the professional/ethical behaviors of timeliness, punctuality, responsibility, confidentiality, and of self-directed task completion

Program Requirements
The following outline of requirements should be used as a planning worksheet.

Certificate of Proficiency in Phlebotomy

12 Credit Hours

The Phlebotomy Program teaches students the hands-on skills of drawing blood, preparing specimens for transport and handling other important lab specimens. Successful completion of the program should prepare students to pass the national certification examination. Phlebotomy technicians work in hospitals, clinics, and doctor’s offices.

Program Goals

Program graduates are expected to satisfy the following Technical/Occupational Outcomes:

- Possess the technical skills required of entry level employees in their career areas.
- Demonstrate knowledge of health care delivery system and medical terminology.
- Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, or respect for supervisors, and co-workers, and self-directed task completion.
- Successfully complete the national certification examination.

Job Opportunities

Hospitals    Clinics    Doctor’s offices

Program Requirements

The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their programs of study.

Associate of Applied Science in Medical Assisting Technology

60-61 Credit Hours

The Associate of Applied Science in Medical Assisting is designed to prepare students to function in multiple functions in health care settings from routine office procedures to administering medications as directed by the doctor. Completers will be ready for entry level positions in doctor offices and health clinics.

Special Admissions/Enrollment Requirements

Students must meet the following criteria:

- Be at least 18 years of age
- Have a high school diploma, or equivalent, at the time of application
- Meet required placement test scores or successful completion of DRDG 1024 Developmental Reading II and DENG 1054 Developmental English II
- Meet required placement test scores or successful completion of DMTH 1024 Developmental Mathematics II
- Have a minimum overall GPA of 2.0 or greater
- Complete a program application, which is available from the Allied Health Sciences Division or email at alliedhealth@midsouthcc.edu
- Interview with program faculty
• Submit to a substance abuse screening and criminal background check during the first week of class and before starting externship
• Students will be required to complete and submit proof of immunization by the end of the second semester of enrollment for the following: Hepatitis-B, Measles/Mumps/Rubella (MMR), Tetanus/Diphtheria/Pertussis (TDaP), Flu, and a negative TB skin test.

Job Opportunities

Well-trained and educated medical assistants work in professional environments as integral members of the healthcare team.

Group Practices  Laboratories  Health Care Facilities
Clinics  Hospitals  Private Offices

Program Goals

In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will

• Demonstrate knowledge of administrative duties utilizing basic secretarial skills; scheduling; monitoring appointments; interviewing and taking patient history; preparing and maintaining medical records; applying computer concepts for office procedures; performing medical transcription; and locating resources and information.
• Demonstrate knowledge of infection control and safety.
• Demonstrate knowledge the technical skills required of entry-level employees in their career areas such as, taking vitals; recognizing medical emergencies; performing basic first aid and CPR; preparing and maintaining the treatment area; preparing patients for procedures; processing specimens; and administering medications as directed by the physician.
• Demonstrate knowledge by taking the National Certification Exam.
• Demonstrate or display professionalism by projecting a positive attitude; working as a team member; showing initiative and responsibility; and promoting the profession.
• Demonstrate competency in the general education outcomes identified for all MSCC graduates.

Program Requirements

The following outline of requirements should be used as a planning worksheet. Students should take care to check course descriptions and prerequisites in planning their program of study.

Associate of Applied Science in Respiratory Care

87 Credit Hours

The Respiratory Care program provides students with the knowledge and practical skills necessary for successful entry into the profession of Respiratory Care as a Respiratory Therapist. The program offers quality learning to address the occupational needs of the diverse population of students in the tri-state area. Graduates of the Respiratory Care program are eligible to sit for the NBRC (National Board of Respiratory Care) Entry Level Exam. Upon completion of the NRBC Entry Level Exam, graduates will be eligible to sit for the NBRC Advanced Practitioners Exam. Respiratory Therapists who pass this test will earn the title of Registered Respiratory Therapist.

The Respiratory Care program at Mid-South Community College holds Provisional Accreditation from the Commission on Accreditation for Respiratory Care (CoARC, www.coarc.com). This status signifies that a program that has been granted an Approval of Intent has demonstrated sufficient compliance to initiate a program in accordance with the Standards through the completion and submission of an acceptable Self Study Report (SSR) and other documentation required by the CoARC Board. The conferral of Provisional Accreditation denotes a new program that has made significant progress towards meeting the Standards of Accreditation. The program will remain on Provisional Accreditation until achieving Initial Accreditation. It is recognized by the National Board of Respiratory Care (NBRC) toward eligibility to the Respiratory Care Credentialing Examination(s). Enrolled students completing the program under Provisional Accreditation are considered graduates of a CoARC accredited program.

Special Admissions/Enrollment Requirements

Students must meet the following criteria:

- Be at least 18 years of age
- Have a high school diploma, or equivalent, at the time of application
- Successfully complete all required prerequisites for admittance to the program: ENGL 1113 English Composition, MATH 1113 College Algebra, MEDP 1033 Medical Terminology, BIOL 1114 Biology, and BIOL 1214 Anatomy & Physiology I.
- Successfully complete all program admittance prerequisites by the end of the spring semester prior to the fall semester for which the student is accepted into the program. Anatomy & Physiology I must have been successfully completed within the last seven years.
• Have a minimum overall GPA of 2.5 or greater
• Complete a program application, which is available from the Allied Health Sciences Division or through an email request at alliedhealth@midsouthcc.edu.
• Interview with program faculty.
• Observe a Respiratory Care department and the day-to-day activities of a therapist and complete an observation log.
• Submit to a substance abuse screening and criminal background check during the first week of class and prior to enrolling in RSPT 2963 Respiratory Care Clinical I.
• Complete and submit proof of immunization by the end of the first semester of enrollment for the following: Hepatitis-B, Measles/Mumps/Rubella (MMR), Tetanus/Diphtheria/Pertussis (TDaP), Meningitis, and a negative skin test. Students will also be required to have a flu shot during the fall semester of the first and second years.

**Job Opportunities**
Well-trained and educated Respiratory Therapists work in professional environments as integral members of the healthcare team. Job settings may include the following:

<table>
<thead>
<tr>
<th>Hospitals</th>
<th>Physician Offices</th>
<th>Homecare</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sleep Labs</td>
<td>Education</td>
<td>Research</td>
</tr>
</tbody>
</table>

**Program Goals**
This program prepares graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRT). Graduates are educationally prepared to successfully practice in a wide variety of clinical settings to evaluate, treat, and manage patients across the life span who are experiencing respiratory and cardiopulmonary disorders.

• Graduates will demonstrate knowledge by successful completion of the NBRC Entry Level exam and then the NBRC Advanced Practitioner exam.
• Graduates will then be eligible to become licensed in Arkansas or the state of their choice.
• Graduates will demonstrate competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists to enter the job market or transfer to a college or university.
• Students will demonstrate behaviors consistent with an entry-level respiratory therapist in the areas of communication, collaborative learning and critical thinking/problem solving skills.
• Graduates will demonstrate competency in the general education outcomes identified for all MSCC graduates listed on page 93-94.
• Students will display professionalism by projecting a positive attitude; working as a team member; showing initiative and responsibility; and promoting the profession.

**Program Prerequisites (18-19 hours)**
Students must successfully complete the following courses PRIOR to applying for admittance to the Respiratory Care program. To ensure acceptance for a fall class, students must complete these program admittance prerequisites no later than the previous spring semester.

Aviation

Aviation Maintenance Technology

MSCC is committed to frequent review and revision of its technical programs to ensure they meet the evolving needs of business and industry. The Aviation Maintenance Technology programs are under revision for students declaring the programs as of the fall semester of 2014. New students should confer with an academic advisor prior to enrolling in fall classes.

Mid-South Community College offers a career pathway in Aviation Maintenance Technology which prepares students for three Federal Aviation Administration certifications as well as completion of an associate’s degree in the field.

Certificate of Proficiency in General Aviation Maintenance Technology

18 hours

The General Aviation Maintenance certificate addresses the general knowledge area required for FAA (Federal Aviation Administration) certification as an airframe and powerplant maintenance technician.

Job Opportunities
Mechanics Helper          Aircraft Parts Department          Aircraft Line Service

Program Goals
Program completers will

• Develop the technical skills necessary for entry-level employment in the aviation maintenance industry including a basic understanding of math, physics, and electricity as they apply to aviation maintenance, as well as an introduction to associated tools, drawings and regulations.

• Meet the technical knowledge requirement for General Aviation Maintenance mechanic certification, required by Federal Aviation Regulation, Part 65.

• Strengthen core skills in reading, writing, mathematics, and science reasoning common to the aviation maintenance industry

Program Requirements

The following outline of requirements should be used as a planning worksheet. Students enroll in this program on a cohort basis and must follow the required course sequence.

Technical Certificate in Aviation Airframe Maintenance Technology

32 Credit Hours

The Powerplant Aviation Maintenance certificate provides students with the knowledge and hours required for the FAA (Federal Aviation Administration) Airframe certificate. The subjects covered include reciprocating and turbine engine operation theory, lubrication, powerplant electricity, ignition, starting, fire protection, auxiliary power units, engine instruments, induction, exhaust, cooling, fuel systems and fuel metering, propeller operation and overhaul, and powerplant inspection.

Students who successfully complete the Certificate of Proficiency in General Aviation Maintenance Technology and the Technical Certificate in Aviation Powerplant Maintenance Technology classes will be eligible for the FAA “Mechanics Certificate” (Airframe Specialization) testing process.

Job Opportunities
- Avionics Technician
- Composite Technician
- Aircraft Painter
- Sheet Metal Technician
- Electrician

Program Goals

• Develop the technical skills expected of a beginning licensed mechanic for the repair, maintenance, inspection and overhaul of airframe, including electrical systems, sheet metal, welding, hydraulic systems, rigging and assembly, wood, fabric, and doping, and general overhaul procedures.

• Meet the technical knowledge requirement for Airframe Maintenance certification, required by Federal Aviation Regulation, Part 65.

• Develop core skills in reading, writing, mathematics, and science reasoning necessary for employment in the aviation maintenance industry.

Program Requirements

The prerequisite requirement for this course of study is successful completion of the Certificate of Proficiency in General Aviation Maintenance Technology. Students enroll in this program on a cohort basis and must follow the required course sequence:

AMTA 1076............Aircraft Metallic Structures.................................6
AMTA 1094............Aircraft Composite Structures............................4
AMTA 1104............Aircraft Systems I ..............................................4
AMTA 2006............Aircraft Electricity .............................................6
AMTA 2024............Aircraft Inspection and Rigging............................4
AMTA 2044............Aircraft Systems II ..............................................4
AMTA 2064............Aircraft Instruments and Avionics.......................4

Required Course Sequence: Students enroll in this program on a cohort basis and must follow the required course sequence.

Summer Semester
AMTA 1076............Aircraft Metallic Structures.................................6

Fall Semester
AMTA 1094............Aircraft Composite Structures............................4
AMTA 1104............Aircraft Systems I ..............................................4
AMTA 2006............Aircraft Electricity .............................................6
Technical Certificate in Aviation Powerplant Maintenance Technology

31 Hours

The Powerplant Aviation Maintenance certificate provides students with the knowledge and hours required for the FAA (Federal Aviation Administration) Powerplant certificate. The subjects covered include reciprocating and turbine engine operation theory, lubrication, powerplant electricity, ignition, starting, fire protection, auxiliary power units, engine instruments, induction, exhaust, cooling, fuel systems and fuel metering, propeller operation and overhaul, and powerplant inspection.

Students who successfully complete the Certificate of Proficiency in General Aviation Maintenance Technology and the Technical Certificate in Aviation Powerplant Maintenance Technology classes will be eligible for the FAA “Mechanics Certificate” (Powerplant specialization) testing process.

Job Opportunities
Powerplant Technician       Engine Manager       Jet Engine Mechanic

Program Goals
• Develop the technical skills expected of a beginning licensed mechanic for the repair, inspection and overhaul of aircraft powerplants, including their electrical components, propellers, ignition systems, lubrication systems, fuel systems, and exhaust systems
• Meet the technical knowledge requirement for Powerplant Maintenance certification, required by Federal Aviation Regulation, Part 65.
• Develop core skills in general education in reading, writing, mathematics, and science reasoning necessary for employment in the aviation maintenance industry.

Program Requirements
The prerequisite requirement for this course of study is successful completion of the Certificate of Proficiency in General Aviation Maintenance Technology. Students enroll in this program on a cohort basis and must follow the required course sequence.

Summer Semester
AMTP 1036...........Reciprocating Engines II.................................................6
Associate of Applied Science in Aviation Maintenance Technology

101 Credit Hours

The Aviation Maintenance Technology program provides an up-to-date, intensive training for this occupational field. Students who successfully complete the program, which is certified by the Federal Aviation Administration (FAA) under Title 14 CFR Part 147, meet the training and experience requirements of the FAA for Airframe and/or Powerplant certificate ratings. The number of credit hours is determined by the FAA required hours.

The Aviation Maintenance Technology curriculum is divided into three (3) parts: General, Airframe, and Powerplant. A student enrolling in this course of study must first enroll for the general curriculum. Upon completion of the general section, the student may elect to pursue the Airframe and/or Powerplant section.

Completion of the general curriculum qualifies the student for an Aviation General Certificate of Proficiency. Further successful completion of the Airframe and/or Powerplant courses satisfies FAA requirements of training and experience prior to testing for one or both of these ratings. Students will be awarded technical certificates upon reaching the Airframe and/or Powerplant training milestones. Though not required for FAA certification, Mid-South Community College offers an AAS degree in this field. In order to qualify for the AAS degree, the student must complete the prescribed program of General, Airframe, and Powerplant sections, plus the additional General Education requirements.

Job Opportunities

Maintenance Manager  Production Manager  Service Manager  Engine Manager

Aviation maintenance technicians may expect to gain employment in a wide variety of fields and locations. Various fields include but are not limited to airline, manufacturing, repair station, charter operation, corporate, general aviation, and airport operation. Very lucrative aviation maintenance positions are available in state as well as across the nation and worldwide. Skills sets acquired through the program also directly fit many job requirements for the missiles/defense industry and other technical fields.

Program Goals

In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will

• Develop the technical skills necessary for entry-level employment in the aviation maintenance industry including

• Gain a basic understanding of math, physics, and electricity as they apply to aviation maintenance, as well as an introduction to associated tools, drawings and regulations.

• Learn technical skills for the repair, inspection and overhaul of aircraft powerplants, including their electrical components, propellers, ignition systems, lubrication systems, fuel systems, and exhaust systems
• Acquire skills for the repair, maintenance, inspection and overhaul of airframe, including electrical systems, sheet metal, welding, hydraulic systems, rigging and assembly, wood, fabric, and doping, and general overhaul procedures.

• Meet the technical knowledge requirement for mechanic certification, require by Federal Aviation Regulation, Part 65.

• Develop general education in reading, writing, mathematics, and science reasoning applicable to the aviation industry.

### Professional Pilot

**Associate of Applied Science in Professional Pilot**

**Note:** The Associate of Applied Science in Professional Pilot degree program is currently being revised, and as a result, no new enrollments will be accepted at this time.
Business Technology

Certificate of Proficiency in Administrative Office Procedures

15 Credit Hours
The goal of this program is to meet the needs of students seeking short-term occupational training that will prepare them to work in an administrative/office environment in various entry-level positions. The program will also provide certification opportunities for individuals who are currently employed and seeking to further their formal education and training.

Job Opportunities
Various entry-level administrative office positions.

Program Prerequisite
Successful completion of DKEY 1101 Computer Keyboarding or approved proficiency test.

Program Goals
Program completers will
• Demonstrate office administration skills including organization, communication, and storage and retrieval of information
• Apply fundamental knowledge of computers and applications software including Microsoft Word and Excel
• Demonstrate speed and accuracy in computer applications and proofreading skills
• Demonstrate the professional/ethical behaviors of timeliness and self-directed task completion

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should check course prerequisites carefully while planning their program of study.

Technical Courses
COMP 1113.................Computer Fundamentals .................................3
COMP 2003.................Keyboarding for Professionals ............................3
COMP 1413.................Document Processing ........................................3
COMP 1313 ..........Spreadsheet Applications* .....................................3
BUSN 1223...............Administrative Office Procedures .........................3
*Microsoft Office Specialist (MOS) examination required.

Associate of Applied Science in Business Technology

62-63 Credit Hours
Students choosing this major will obtain a core of general education and fundamental business skills and knowledge. Two concentrations of study are provided: Business Administration, which provides a basic understanding of business, economics and accounting issues, and Applications Specialist, which provides a basic understanding of business issues and prepares students for Microsoft Office Specialist© certification.

Students planning to transfer to a four-year institution should note two possible options. Those planning to transfer to bachelor of science degrees in business should complete the Associate of Science
Degree. Students should verify, in advance, which electives their transfer institution of choice will accept. Students planning to transfer to the University of Arkansas – Fort Smith’s Bachelor of Applied Science degree may prefer to complete an Associate of Applied Science in Business Technology.

**Job Opportunities**

Office Manager  
Applications Management Specialist  
Office Support Technician  
Small Business Manager

**Program Goals**

In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will:

- Apply the skillful use of common tools and technology relevant to their field of study
- Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion
- Plan and document, using grammar and language appropriate to the workplace, a business project that is comprehensive, logical, and attainable

**AAS in Business Technology, Business Administration Option**

The following outline of requirements should be used as a planning worksheet. Students should take care to check course descriptions and prerequisites in planning their program of study.

**General Education Core (15-16 hours)**

**Communication (9 hours required)**

**Associate of Science in Business**

**62 Credit Hours**

The Associate of Science degree includes the state minimum core, but differs from the Associate of Arts degree and the Associate of Applied Science degree in that students are required to take additional hours in math and science and are allowed a wider choice of elective courses.

Students choosing this major will obtain a core of general education and fundamental business skills and knowledge designed for those intending to pursue a bachelor’s degree in the field of business at a four-year Arkansas institution.

Credits earned in the State Minimum Core are transferable to all Arkansas public institutions of higher education. Students seeking the Associate of Science degree should refer to the curriculum requirements of the intended transfer institution when selecting courses to ensure maximum transfer credit. Students taking courses beyond the core, or students planning to transfer to out-of-state institutions, should follow the curriculum advised by the transfer institution and obtain written assurance, in advance, of the transferability of credits earned at MSCC. Credits earned in the Business Core Requirements provide a basic understanding of business, economics and accounting issues.

The following schools accept this completed degree in its entirety: Arkansas State University, Arkansas Tech University, Henderson State University, Harding University, University of Central...
Arkansas, University of Arkansas Fort Smith, University of Arkansas Little Rock, University of Arkansas Monticello, University of Arkansas at Pine Bluff and Southern Arkansas University.

In compliance with Arkansas law, all associate degree students are tested on their learning in the general education curriculum. Students who complete 45-60 hours in the Associate of Science degree program will be tested prior to graduation for proficiency in mathematics, writing, reading, and scientific reasoning. Students eligible for the tests will be notified of testing dates and times. Students attending Arkansas public colleges and universities must present test scores in order to continue their education above the sophomore level.

**Program Goals**

In addition to satisfying the General Education Learning Outcomes, program graduates will

- Apply critical thinking, problem solving and technology skills to explore solutions to business-related issues.
- Apply the skillful use of common tools and technology relevant to their field of study.
- Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion.
- Plan and document, using grammar and language appropriate to the workplace, a business project that is comprehensive, logical, and attainable.
- Demonstrate the ability to analyze and interpret scientific principles and modes of inquiry.

**Degree Requirements**

The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their program of study. The recommended outline assumes that students are unconditionally enrolled at the time of entry and ensures that students will satisfy the College's academic requirements within the specified time frame. Students needing developmental coursework should refer to the guidelines for Conditional Enrollment on page 40.

**Note:** Students seeking an Associate of Science who are conditionally admitted must successfully complete, with a cumulative 2.0 GPA, the following twelve (12) hours of core academic courses within the first thirty (30) hours of college-level enrollment (students who fail to do so will not be permitted to enroll in additional courses until these requirements are met).

**General Education Core (35 hours)**

**English (6 hours required)**

- ENGL 1113............English Composition I..................................................3
- ENGL 1123............English Composition II....................................................3

**Diesel Maintenance Technology**

**Certificate of Proficiency in Heavy Truck Diesel Maintenance**

**16 Credit Hours**

The Certificate of Proficiency in Heavy Truck Diesel Maintenance provides students with the technical skills needed to perform basic maintenance for heavy truck engines, electrical systems and brake systems. Hours earned in this program will also apply toward completion of a Technical Certificate in Heavy Truck Diesel Maintenance.

**Job Opportunities**

Mechanic (small shops)        Fleet Technicians (large shops)
Lead Technicians (trucking companies) Shop Foreman (dealerships)
Specialty Technicians (dealerships Part Technicians)

**Program Goals**

Program graduates will be able to

- Know and apply the terminology common to heavy truck/diesel mechanics
- Apply the skillful use of common tools, test equipment, and technology for preventive maintenance
- Troubleshoot and repair electrical and brake systems
- Demonstrate the professional/ethical behaviors of timeliness and self-directed task completion
Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

HTDM 1014 ..........Preventive Maintenance.................................4
HTDM 1034 ..........Brake Systems.................................................4
HTDM 1054 ..........Diesel Engines I ...............................................4
HTDM 1094 ..........Diesel Engines II ..............................................4

Technical Certificate in Diesel Maintenance Technology
41 Hours
The Technical Certificate in Diesel Maintenance provides students with the technical skills expected in an entry-level position as a truck technician. Hours earned in this program will also apply toward completion of an Associate of Applied Science in General Technology.

Job Opportunities
Heavy Truck/Diesel Mechanic Service Writer Specialty Technician
Parts Manager Shop Supervisor
Service Technician Service Manager

Program Goals
In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will be able to

• Know and apply the terminology common to heavy truck/diesel mechanics
• Apply the skillful use of common tools, test equipment, and technology for preventive maintenance
• Troubleshoot and repair fundamental heavy truck systems
• Demonstrate the professional/ethical behaviors of timeliness and self-directed task completion

Program Requirements
The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Program Prerequisite (3 hours)
COMP 1113 Computer Fundamentals or documented evidence of requisite computer knowledge and skills. Students without the required computer knowledge and skills may take COMP 1113 as a general elective during the first semester of enrollment.

General Education Core (7 hours)
ENGL 1113 ..........English Composition I.......................................3
DMTH 1034 ..........Developmental Math III....................................4
or
MATH 1104 ..........Applied Technical Math ....................................4

College Requirement (1 hour)
CSUR 1101 College Survival Skills ..............................................1
Technical Requirements (34 Hours)
- HTDM 1014 Preventive Maintenance............4
- HTDM 1024 Electrical Systems..................4
- HTDM 1034 Brake Systems........................4
- HTDM 1044 Electrical Systems II................4
- HTDM 1054 Diesel Engines I........................4
- HTDM 1063 HVAC Systems........................3
- HTDM 1073 Steering and Suspension............3
- HTDM 1084 Powertrain............................4
- HTDM 1094 Diesel Engines II....................4

Digital Media

60/61 Credit Hours

Associate of Applied Science in Digital Media

Job Opportunities
- Video Technician
- Camera Technician
- Audio Technician

Program Goals
In addition to the General Education Learning Outcomes listed on pages 105-106, Associate of Applied Science in Digital Media graduates are expected to satisfy the following Program Goals:

- Operate professional, high-definition video equipment and compulsory accessories.
- Compose cinematic shots that demonstrate adequate knowledge of camera angles, focal length, and the various types of shots.
- Utilize non-linear editing software to edit videos that evidence familiarity with the concepts of importing, exporting, cutting, transitioning, matching action, and creating text.
- Identify basic cinematic terminology and explain the requirements and duties of various roles on a film set such as director, editor, and cinematographer
- Demonstrate basic proficiency in screenwriting techniques, audio production and with editing equipment.
- Use screenwriting software to compose story ideas.
- Produce recorded content in a studio and field environment

The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their courses of study.

State Minimum Core (18 hours)

Communications (9 hours required)
- ENGL 1113 English Composition I...................3
- ENGL 1123 English Composition II..................3
- or ENGL 1133 Writing for the Workplace............3
- ENGL 2303 Oral Communication.....................3
Computer Skills (3 hours required)
COMP 1113 .................. Computer Fundamentals ........................................3

Education

The Arkansas State Board of Education recently adopted new licensure standards/requirements for educator preparation programs for grades K-6 (formerly P-4) and middle-level, effective Fall 2015. As a result, the Associate of Arts in Teaching must be revised and approved by the Arkansas Department of Higher Education before new students may enter the program. For the 2014-2015 academic year, students will be advised to enroll in the Associate of Arts. Assistance is available in the Advising Success Center.

General Education

Associate of Arts in General Education

60 credit Hours

An associate of arts (AA) degree is designed for students who wish to complete the first two years of a baccalaureate degree and transfer to a four-year institution. The AA degree in General Education at MSCC requires 60 credit hours.

Credits earned in the 35-hour State Minimum Core are transferable to all Arkansas public institutions of higher education. Students taking courses beyond the core, or students planning to transfer to out-of-state institutions, should follow the curriculum advised by the transfer institution and obtain written assurance, in advance, of the transferability of credits.

In compliance with Arkansas law, all college students are tested on their learning in the general education curriculum. Students who complete 45 to 60 hours in the Associate of Arts degree program will be tested prior to graduation for proficiency in mathematics, writing, reading, and scientific reasoning. Students eligible for the tests will be notified of testing dates and times. Students attending Arkansas public colleges and universities must present test scores in order to continue their education above the sophomore level.

The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their courses of study.

Program Goals

In addition to the General Education Learning Outcomes listed on pages 105-106, Associate of Arts in General Education students are expected to satisfy the following program goal:

- Demonstrate the ability to analyze and interpret scientific principles and modes of inquiry.
Associate of Arts in General Education

State Minimum Core (35 hours)

English (6 hours required)
ENGL 1113 .................. English Composition I .......................................................... 3

General Technology

Associate of Applied Science in General Technology

61-62 Credit Hours

The Associate of Applied Science in General Technology provides students with the opportunity to complete an individualized program of study to fulfill a unique career goal by combining general
education with specific technical knowledge and skills in preparation for employment or career advancement in industrial settings. A core of general education courses is required with at least 24 and no more than 30 technical credit hours must be from one technical area. Remaining credit hours (15-21) may be drawn from one or two related areas. Students may apply hours earned in approved technical certificate programs or receive portfolio credit for professional certifications or work experience toward the degree requirements. A maximum of 30 credits, but no more than nine (9) credits in the major technical area, however, may be earned through portfolio credit or credit by examination. Guidelines for developing credit portfolios are available from the Associate Vice President for Workforce Programs or the Academic Affairs Office, and validation of portfolio experience is dependent upon the approval of the Associate Vice President for Workforce Programs with input from the appropriate program advisory committee members.

Students choosing the AAS in General Technology must have their programs of study approved in advance by the Registrar. Guidelines for developing credit portfolios are available from the Registrar’s Office or the Academic Affairs Office, and validation of portfolio experience is dependent upon the approval of the Associate Vice President for Workforce Programs with input from the appropriate program advisory committee members.

Program Goals

In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will

• Know and be able to apply the terminology and conceptual frameworks related to common organizational structures and basic operations in the workplace
• Have the technical skills expected of entry-level employees in their field of study
• Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion

Other specific technical goals may apply depending upon the student’s choice of major technical area.

Note: All students must complete ENGL 1113 English Composition I; DMTH 1034 Developmental Math III, MATH 1104 Applied Technical Math, or MATH 1113 College Algebra; and two technical courses to be approved by the Registrar within the first 30 hours of college-level enrollment

Students choosing the AAS in General Technology must meet with the Registrar to obtain an approved degree plan which includes a minimum of 15 approved general education core credits and 43-45 approved technical credits.

**Hospitality Management**

Created as a partnership between Mid-South Community College and Southland Park Gaming and Racing, the Hospitality Management programs include a certificate of proficiency, technical certificate, associate of science and associate of applied science degrees. The primary focus of the programs is to serve the needs of the ever-growing hospitality industry in general and Southland Park and Gaming in
particular. The University of Memphis Kemmons Wilson School of Hospitality and Resort Management is partnering with MSCC for a seamless transfer of the Associate of Science Degree.

Depending upon their choice of program(s), students may earn one or more of the following National Restaurant Association Educational Foundation industry certifications:

- Controlling Foodservice Costs – Food and Beverage Cost Controls
- Hospitality and Restaurant Management – Restaurant Layout & Design
- ServSafe Food Protection Manager – Food Service Management.

**Certificate of Proficiency in Food Service Management**

**12 hours**

**Job Opportunities**

Food Preparation/Crew leader, Assistant Cooks/Line Cooks

**Program Goals**

Program graduates are expected to satisfy the following:

- Acquire a fundamental understanding of hotel, lodging, housekeeping, and food services management
- Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion
- Successfully apply learned theory and principles in practical applications relevant to the hospitality industry.

**Certificate of Proficiency in Food Service Management**

HMGT 1013 ................Applications of Food Service Management in the Hospitality Industry* ........................................3
HMGT 1143 ................Food Service Management ..................................................3
HMGT 1513 ................Nutrition and Menu Planning .............................................3
HMGT 2023 ................Food and Beverage Cost Controls.................................3

*This course does not apply toward the technical certificate or the associate degrees.

**Certificate of Proficiency in Hospitality Management**

**18 hours**

**Job Opportunities**

Food Service Supervisor/Assistant Manager, Housekeeping Supervisor/Assistant Manager
Restaurant Supervisor/Assistant Manager, Front Desk Supervisor/Assistant Manager
Food and Beverage Supervisor/Assistant Manager

**Program Goals**

Program graduates are expected to satisfy the following:

- Acquire a fundamental understanding of hotel, lodging, housekeeping, and food services management
• Apply the skillful use of common tools and technology relevant to their field of study
• Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion
• Successfully apply learned theory and principles in practical applications relevant to the hospitality industry.
• Successfully pass the National Restaurant Association ServSafe Food Protection Manager Certification exam.

The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their courses of study.

Recommended Course Sequence
The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their courses of study. The recommended outline assumes that students are unconditionally enrolled at the time of entry and ensures that students will satisfy the College’s academic requirements within the specified time frame.
Students needing developmental course work should refer to the guidelines for Conditional Enrollment on page 40.

## Associate of Applied Science in Hospitality Management

### 60/61 Credit Hours

### Job Opportunities

#### Food Service
- Food Preparation/Crew leader
- Assistant Cooks/Line Cooks
- Kitchen Supervisor/Manager
- Food Service Supervisor/Assistant Manager
- Restaurant Supervisor/Assistant Manager
- Food and Beverage Supervisor/Assistant Manager

#### Lodging
- Housekeeping Supervisor/Assistant Manager
- Front Desk Supervisor/Assistant Manager
- Front Desk Supervisor/Assistant Manager
- Hotel Operations Supervisor/Assistant Manager
- Sales & Catering Supervisor/Assistant Manager
- Assistant General Manager
- Hotel General Manager
Program Goals
In addition to the General Education Learning Outcomes listed on pages 105-106, Associate of Applied Science in Hospitality Management students are expected to satisfy the following Program Goals:

- Acquire a fundamental understanding of hotel, lodging, housekeeping, and food services management
- Apply the skillful use of common tools and technology relevant to their field of study
- Demonstrate the professional/ethical behaviors of punctuality, of regular attendance, of respect for supervisors and co-workers, and of self-directed task completion
- Successfully apply learned theory and principles in practical applications relevant to the hospitality industry.
- Successfully complete the National Restaurant Association ServSafe Food Protection Manager Certification exam, the National Restaurant Association ManageFirst: Nutrition Certification exam, and the National Restaurant Association Controlling Foodservice Costs certification exam, as well as other industry certifications based upon the student’s choice of program technical electives.

The following outline of requirements should be used as a planning worksheet. Students should check course descriptions and prerequisites in planning their courses of study.

State Minimum Core (15/16 hours)

Communications (9 hours required)

- ENGL 1113 ...... English Composition I ........................................ 3
- ENGL 1123 ...... English Composition II ...................................... 3
- or
- ENGL 1133 .. Writing for the Workplace ..................................... 3
- ENGL 2303 ... Oral Communication .......................................... 3

Mathematics (3/4 hours required)

Select one class
- DMTH 1034 ... Developmental Math III ...................................... 4
- MATH 1104 ... Applied Technical Math ....................................... 4
- MATH 1113 ... College Algebra .................................................. 3

History/Social Science (3 hours required)

Select one class
- HIST 2123 ... U.S. History Before 1877 .................................... 3
- HIST 2133 ... U.S. History After 1877 ...................................... 3
- POLS 1143 ... American Government .................................... 3
- PSYC 1403 ... Introduction to Psychology .................................. 3
- SOCI 1303 ... Introduction to Sociology ................................... 3

MSCC Requirement (2 hours)

- BUSN 1201 ... Career Preparation ........................................ 1
- CSUR 1101 ... College Survival Skills ...................................... 1

Business Core (9 hours required)

- BUSN 1423 ... Principles of Accounting I .................................. 3
- COMP 1113 ... Computer Fundamentals ................................... 3
ECON 2213 .......................... Macroeconomics .................................................. 3

**Hospitality Management Technical Core (32 Hours required)**

HMGT 1003 .......................... Introduction to Hospitality and Tourism Management ..................... 3
HMGT 1033 .......................... Hotel, Lodging and Housekeeping Management ...................... 3
HMGT 1043 .......................... Professionalism in Hospitality ............................................. 3

Information Systems Technology

Certificate of Proficiency in Micro-Computer Upgrade and Repair

15 Credit Hours

Upon completing this program, students will have gained the knowledge to obtain an entry-level position as a computer technician in micro-computer repair and be prepared for the A+ Certification examination. Courses in this program will also apply toward completion of the AAS in Information Systems Technology at Mid-South Community College and are ideally suited for students who want to prepare for networking certifications.

Job Opportunities

Computer Repair Technician A+ Technician

Program Goals

Program graduates will be able to

• Utilize diagnostic techniques to identify and correct hardware and configuration problems

• Recognize, understand, and utilize the relationships of various hardware and software components designed for the construction of computer systems
• Demonstrate the professional/ethical behaviors of timeliness and of self-directed task completion

In addition, graduates will be prepared to take the CompTIA A+ Certification exam.

Program Requirements

The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Certificate of Proficiency in Networking

15 Credit hours

This Network Associate Certificate of Proficiency trains students in the installation and configuration of routers and switches and introduces them to the Sun Solaris and UNIX operating systems. ISTC 1013 IT Principles and Practices must be taken as a prerequisite to the program or as a corequisite with ISTC 1513 Network Fundamentals.

Program Goals

Program graduates will be able to

• Apply the skillful use of common tools and technology relevant to their field of study
• Demonstrate the professional/ethical behaviors of timeliness and of self-directed task-completion
• Troubleshoot an environment that uses routers and switches for multi-protocol client hosts and services
• Perform entry-level tasks in the planning, design, installation, operation, and troubleshooting of Ethernet and TCP/IP networks

Job Opportunities

Network Engineer  Network Administrator

Other computer networking positions in companies using Ethernet-compliant hardware in their LAN/WANs.

Program Goals

Program graduates will be able to

• Apply the skillful use of common tools and technology relevant to their field of study
• Demonstrate the professional/ethical behaviors of timeliness and of self-directed task-completion
Program Requirements

The following outline of requirements should be used as a planning worksheet. Students should take care to check course prerequisites in planning their program of study.

Associate of Applied Science in Information Systems Technology

62-63 Credit Hours

The AAS in Information Systems Technology provides students with a core of general education courses, as well as courses which prepare them for professional certifications in networking design and administration. Students enrolling in the program must document or demonstrate, through credit by examination, a fundamental understanding of computers and common applications software. Otherwise, they must successfully complete COMP 1113 Computer Fundamentals before or concurrently with any of the ISTC courses. Students who already hold professional certifications in one or both of these areas may satisfy some degree requirements by presenting those certifications to the Registrar’s Office.

The AAS in Information Systems Technology provides students with the networking skills and knowledge needed for today’s multi-platform networking environment. Areas of emphasis include network analysis and design, configuration and implementation, testing, monitoring and management, and system administration and maintenance.

Job Opportunities

Network Administration  PC Support Technician  Network Support  IT Management

Program Goals

In addition to satisfying the General Education Learning Outcomes listed on pages 105-106, program graduates will

- Plan a technical project in a way that is comprehensive, logical and reachable
- Apply the skillful use of common tools and technology relevant to their field of study
- Install, configure, and operate LAN and WAN-access services for small networks, including but not limited to use of these protocols: IP, RIP, OSPF, EIGRP, Frame Relay, VLANs, Fast Ethernet, Ethernet, and Access Lists, and network security
- Demonstrate the professional/ethical behaviors of punctuality, regular attendance, respect for supervisors and co-workers, and self-directed task-completion

Program Requirements

**Bachelor of Science in Information Technology**

The Bachelor of Science in Information Technology is available on the MSCC campus through a partnership agreement with the University of Arkansas – Fort Smith. Additional information is available via the web at [www.uafortsmith.edu/Degrees/BachelorOfScience-BS](http://www.uafortsmith.edu/Degrees/BachelorOfScience-BS), from the UA Fort Smith office in the MSCC University Center, or from the MSCC Registrar’s Office.

**Other Academic Programs and Services**

**College Preparatory Programs**

**Adult Education**

The Adult Education program of Mid-South Community College is committed to providing educational opportunities to all citizens of Crittenden County and, in particular, to those who lack basic skills, who do not have a high school diploma, and/or who speak English as a second language. The
College offers free testing, and classes for adults from the literacy level to basic skills to the Official GED® Test. The three main program areas at MSCC include Adult Education (GED) classes, testing, and Literacy tutoring.

**Adult Education Instruction**

Adult Education classes are available for students who lack a high school diploma. We also offer English as a Second Language classes for students in need of English instruction. We offer morning and evening classes at our Mid-South Community College site. Day classes are offered at East Arkansas Youth Services in Marion (for students age 16-17 only), Crittenden County Detention Center, and at the Shopping Way site. Evening classes are also available at our Gilmore and at Earle sites. Class times are different at the various sites, so students should call (870)733-6871 for current class schedules and for enrollment information.

MSCC is an Official GED® Testing Center for Arkansas residents. Students who pass the Official GED® Test will be recognized at the annual graduation ceremonies held each year. Additional information about the Adult Education program can be obtained by calling the Adult Education department at (870) 733-6871.

**Literacy Council**

The Literacy Council of Crittenden County, administered by MSCC, is a non-profit educational program designed to help fight illiteracy in Crittenden County in order to break the cycle of underachievement associated with poor reading skills. Its purpose is to enable non-reading adults to acquire reading and writing skills through free, student-centered instruction in basic literacy. Students are taught by trained volunteer tutors in one-on-one or small-group settings. Classes are held on the MSCC campus as well as in various off-campus locations, including community centers and businesses. Additional information about adult literacy services may be obtained by visiting the Literacy Council office on the MSCC campus or by calling (870) 733-6763.

**Job-Related Skill Development**

The Arkansas Career Readiness Certificate (CRC) Program allows citizens to measure their skills against those skills required for jobs with area businesses. Anyone who has taken the WorkKeys® assessment and needs to increase his or her score can come to Adult Education to use the KeyTrain® software to improve basic skills before retaking the test. Computers and staff are available to assist in this process during scheduled times each week. For more information please call the Adult Education department at (870) 733-6871.

**Developmental Education**

The College offers students who are under-prepared for college-level work the opportunity to develop basic knowledge and skills in English, reading, and mathematics by taking developmental education courses. Concurrently enrolled high school students may not enroll in developmental education courses except on an audit basis.

Students whose placement scores fall below 19 on the American College Testing (ACT) assessment or equivalent scores on the SAT, COMPASS, or ASSET tests (listed on page 30) will benefit from review
and other preparatory work before enrolling in college courses. Developmental Education courses include the following:

**College Preparation**

**Communications**
- DCOM 1034 Developmental Communication
- DCOM 1054 Developmental Communication II

**Computer Skills**
- DKEY 1101 Computer Keyboarding
- DKEY 1201 Intro to Computers

**Reading and English**
- DRDG 1004 Developmental Reading I
- DENG 1034 Developmental English I
- DRDG 1024 Developmental Reading II
- DENG 1054 Developmental English II

Students enrolled in DENG 1034 who believe by the end of the course that their writing skills are sufficiently strengthened to succeed in degree credit courses may seek the instructor’s permission to test out of DENG 1054. To test out of DENG 1054, students must score an 80 or higher on the COMPASS English test and score a 4 or higher on an essay in relation to criteria established for entry into English Composition I.

Students enrolled in DRDG 1004 who believe their reading skills are sufficiently strengthened by the end of the course to succeed in degree credit courses may seek the instructor’s permission to test out of DRDG 1024. To test out of DRDG 1024, students must score an 82 or higher on the COMPASS test.

Note: Required placement scores or successful completion of both DENG 1054 and DRDG 1024 are prerequisites for most degree credit courses.

Students enrolled in DMTH 1014 Developmental Math I, DMTH 1024 Developmental Math II, or DMTH 1034 Developmental Math III are placed according to placement scores; however, they have the option of pre-testing out of some modules by demonstrating knowledge and immediately moving on to the next course in the sequence.

Students must earn grades of “C” or better to successfully complete Developmental Education courses. Academic advisors and Advising Success Center staff will work with students to develop appropriate class schedules and to identify resources to support their academic success.

Developmental course grades affect students’ grade point averages for their award programs, as well as their financial aid eligibility and academic standing.

**Mid-South Community College Technical Center**

The Mid-South Community College Technical Center (MSCCTC) is a workforce education center that offers college credit in technical programs to high school sophomores, juniors, and seniors in the Crittenden County area, including the Academics of West Memphis. The Center’s curriculum serves as an extension of high school curricular offerings by providing students with hands-on training in technical fields. Services are offered at no cost to the students. Books, tuition, and fees are provided through the Center and are funded by local school districts and the Arkansas Department of Workforce Education.
Purposes

• To provide quality technical education programs to area high school sophomores, juniors, and seniors
• To help students make informed career choices and to provide relevant and supportive learning experiences
• To prepare students to enter the workforce upon high school graduation
• To encourage students to continue their education after high school

Admission Policy

Prospective students apply for admission to MSCCTC programs through their local high school counselor. Admission is based on grade point average, college entrance exam scores, school attendance, citizenship, motivation, ability, and aptitude.

All students are required to submit the following:

• Written recommendation from the high school principal, counselor, and classroom teacher
• Completed application for admission form
• Current high school transcript for each semester of enrollment
• ACT, SAT, PLAN, COMPASS, or ASSET exam scores
• Signed student/parent agreement
• Proof of immunization against mumps, measles, and rubella if born on or after January 1, 1957

Additional information about the Technical Center, including courses of study, may be obtained by calling the Admissions Office at (870) 733-6728.

MSCC University Center

The MSCC University Center is a partner in the Arkansas Delta Education and Training Consortium (ADTEC) University Center (http://adtec-uc.org). Through this partnership and partnerships with other four-year universities, students have access to a variety of baccalaureate and advanced degrees on the MSCC campus.

Programs currently available include the following:

Arkansas State University

Associate in Applied Science degree in Nursing
Bachelor’s degree in Applied Science
Bachelor’s degree in Criminology
Bachelor’s degree in Middle Level Education
Bachelor’s degree in P-4 Education
Bachelor’s degree in Business Administration
Bachelor’s degree in Nursing
Bachelor’s degree in Radiologic Technology
Master’s degree in Business Administration
Master’s degree in K-12 Curriculum and Instruction
Master’s degree in Public School Administration
Master’s degree in Nursing
Arkansas Tech University
Bachelor’s degree in Emergency Management

Bethel University
Online Bachelor’s degree in Organizational Management

Franklin University
Online Bachelor’s degree in Accounting
Online Bachelor’s degree in Applied Management
Online Bachelor’s degree in Business Forensics
Online Bachelor’s degree in Computer Science
Online Bachelor’s degree in eMarketing
Online Bachelor’s degree in Financial Management
Online Bachelor’s degree in Forensic Accounting
Online Bachelor’s degree in Healthcare Management
Online Bachelor’s degree in Human Resources Management
Online Bachelor’s degree in Information Technology
Online Bachelor’s degree in Management
Online Bachelor’s degree in Management Information Sciences
Online Bachelor’s degree in Marketing
Online Bachelor’s degree in Public Safety Management
Online Bachelor’s degree in Web Development

Montana State University-Northern
Bachelor’s degree in Diesel Technology

University of Arkansas at Fayetteville
Bachelor’s degree in Human Resource Development

University of Arkansas at Fort Smith
Bachelor’s of Applied Science degree
Bachelor’s of Science degree in Information Technology

University of Arkansas at Pine Bluff
Program(s) to be announced.

University of Central Arkansas
Bachelor’s degree in Addiction Studies

Workforce, Economic Development

Business and Industry Services

MSCC is committed to the economic development of the Arkansas Delta Region by helping ensure a world-class workforce and by helping attract new industry to the region. In support of those goals, the college participates in a number of regional partnerships which support economic growth and provides comprehensive array of training services for business and industry.

One initiative, the Arkansas Delta Training & Education Consortium (ADTEC), established in late 2005, provides for a coordinated, regional response to workforce development in the Arkansas Delta. ADTEC is a partnership of five community colleges (Mid-South Community College, Arkansas
Northeastern College, East Arkansas Community College, Arkansas State University-Newport, and Phillips Community College of the University of Arkansas System) that are committed to raising the skill level of the workforce and transforming the economy of the Arkansas Delta. In 2006, ADTEC was incorporated into the Arkansas Delta Workforce Innovations in Economic Development (ADWIRED) initiative as the primary workforce training and education provider in the ADWIRED region. In 2007, ADTEC was awarded the prestigious Southern Growth Policy Board Innovator of the Year Award; in 2008, it received the Department of Labor’s Recognition of Excellence Award for Developing a Regionally Focused Workforce Strategy, and in 2010, the Institute of Higher Education at the University of Florida Community College Bellwether Award for Workforce Development. ADTEC is a workforce development consortium that uses proven, successful strategies to implement training and education projects.

ADTEC is a unique partnership in that all participating community colleges collaborate to share curriculum, support strategies, and a wide range of industry input regarding training needs while pursuing the ultimate goal of growing jobs and economic opportunity in the region. ADTEC is able to provide a broad range of training services at a lower overall cost. Continuous industry feedback is an essential element of this workforce development strategy. This strategy is used to develop career pathways which have employable exit-points at 1) high school graduation and award of a certificate of proficiency; 2) award of a technical certificate; 3) award of an Associate of Applied Science Degree; and 4) award of a Bachelor of Applied Science Degree. Students may stop out at any exit point with a college credential in hand, go to work in the selected field of study, and return at any time (whether employed or not) to re-enter the pathway and achieve the next educational level.

MSCC also has partnered with Southwest Tennessee Community College, the Greater Memphis Training and Education Consortium (GMTEC), to collaboratively address the educational and training needs of the larger Memphis metropolitan area.

These partnerships support a variety of continuing education opportunities for personal, professional, and workforce development through open-enrollment credit courses, specialized programs, non-credit online courses, and contract offerings customized to meet specific business or industry needs. Seminars, workshops, customized training, short-term credit and non-credit training, and workforce readiness programs are part of the options available.

Customized training for employers can be developed to meet an endless variety of training needs and can be offered during regular class hours or through creative scheduling arrangements. Programs can be conducted on the MSCC campus, the SWTCC campus, or at an employer’s worksite. Additional information may be obtained by calling 870 733-6012 or visiting the GMTEC office in the Marion Berry Renewable Energy Building, Room 106-C.
